\* Document for sale by Superintendent of Documents.

† Distribution by office issuing document, free if unaccompanied by a price.

‡ Document not obtainable.

## Explanation

Words and figures inclosed in brackets [ ] are given for information, but do not appear on the title-pages of the publications catalogued. When size is not given octavo is to be understood. Size of maps is measured from outer edge of border, excluding margin. The dates, including day, month, and year, given with Senate and House documents and reports, are the dates on which they were ordered to be printed. Usually the printing promptly follows the ordering, but various causes sometimes make delays. When Congress and session are not given with the numbers of Senate and House documents and reports, 63d Congress, 2d session, is to be understood.

## SALES OF GOVERNMENT PUBLICATIONS

The Superintendent of Documents, Washington, D. C., is authorized to sell at cost of paper and printing any United States public document in his charge, the distribution of which is not otherwise provided for.

Publications can not be supplied free to individuals nor forwarded in advance of payment.

Publications entered in this catalogue that are for sale by the Superintendent of Documents, are indicated by a star (\*) preceding the price. A dagger (†) indicates that application should be made to the Department, Bureau, or Division issuing the document. A double dagger (‡) indicates that the document is not obtainable. Whenever additional information concerning the method of procuring a document seems necessary it will be found under the name of the Bureau by which it was published. The Senate and House documents and reports are issued in limited editions and, unless otherwise indicated, may be obtained only through Members of Congress.

In ordering a publication from the Superintendent of Documents, give (if known) the name of the publishing Department, Bureau, or Division, and the title of the publication. If the publication is numbered, give the number also. Every such particular assists in quick identification. Do not order by the Library of Congress card number.

The accumulation of publications in this Office amounts to several millions, of which over a million are assorted, forming the sales stock. Many rare books are included, but under the law all must be sold "at cost," regardless of their age or scarcity. Many of the books have been in stock some time and are apt to be shop-worn. In filling orders the best copy available is sent. A general price-list of public documents is not available, but lists on special subjects will be furnished on application.

### MONTHLY CATALOGUE DISTRIBUTION

The Monthly catalogue is sent to each Senator, Representative, Delegate, Resident Commissioner, and officer in Congress, to designated depositories and State and Territorial libraries, to substantially all Government authors, and to as many school, college, and public libraries as the limited edition will supply.

Subscription price to individuals, \$1.10 a year, including index. Back numbers can not be supplied. Notify the Superintendent of Documents of any change of address.

### LIBRARY OF CONGRESS CARDS

Numbers to be used in ordering the L. C. catalogue cards will be found at the end of the titles of the more important monographic documents. The figure following the card number (separated from it by a slanting line) indicates the number of cards required for entries suggested (title entry not included) on the cards. The price of the cards is 2c. for the first card and 1c. for each additional card for the same title ordered at the same time. Remittances for the L. C. catalogue cards should be made to the Librarian of Congress. They can not be furnished by the Superintendent of Documents.

## INDEX

An Index to the Monthly catalogue is issued at the end of the fiscal year. This contains index entries for all the numbers issued from July to June, and can be bound with the numbers as an index to the volume. Persons desiring to bind the catalogue at the end of the year should be careful to retain the numbers received monthly, as duplicate numbers can not be supplied.

## HOW TO REMIT

Remittances for the documents marked with a star (\*) should be made to the Superintendent of Documents, Washington, D. C., by postal money order, express order, or New York draft. Currency, if sent, will be at sender's risk.

Postage stamps, foreign money, and defaced or smooth coins are not acceptable.

No charge is made for postage on documents forwarded to points in the United States, Alaska, Guam, Hawaii, Philippine Islands, Porto Rico, Samoa, or to Canada, Cuba, Mexico, or Shanghai. To other countries the regular rate of postage is charged, and remittances must cover such postage.

The issue of coupons redeemable in public documents by the Superintendent of Documents has been discontinued. Holders of coupons are requested to return the same for redemption.

## NOTES OF GENERAL INTEREST

Bulletin 148, Labor Statistics Bureau, containing the Labor laws of the United States and also of the several States, with decisions of the courts relating thereto, up to the close of the year 1913, is in course of publication in parts, Part 1, filling 1216 large pages, having been already received. This part contains the legislation of the States in alphabetical order from Alabama to Missouri. Part 2 will have the similar material from Montana to United States, and will fill about the same number of pages. This important compilation gives the full text of labor legislation and a digest of the court decisions by which it has been construed. This is the 5th compilation of the kind which has been made by the Labor Bureau (now Labor Statistics Bureau), but the latest previous one was issued in 1907, and the succeeding seven years have been full of activity in the field of labor legislation. Nine States now have minimum-wage laws, though the central government at Washington has not yet taken that step. The States which have done so are California, Colorado, Massachusetts, Minnesota, Nebraska, Oregon, Utah, Washington, and Wisconsin, while Ohio, though it has no such law at present, has adopted a new constitution which authorizes it. There are many new laws relating to the inspection and regulation of factories and mines and to various features of railroad administration.

A prodigious book is House document 226 of the 63d Congress, 1st session, being 4½ inches thick, the greater part of this bulk being, however, taken up by maps. Its title is Water terminal and transfer facilities, and its substance is reports by Army engineer officers on the condition and present and prospective commercial value of the existing facilities for water transportation in this country.

By House resolution 593, 63d Congress, 2d session, it was directed that 5,000 copies of the report of the Proceedings of the First and Second International Peace Conferences, held at The Hague, 1899 and 1907, be printed as House document 1151, 63d Congress, 2d session.

Senate document 537, 63d Congress, 2d session, is a report of the memorial exercises held at Nashville, Apr. 9, 1912, by the Southern Commercial Congress, in honor of the late Seaman A. Knapp, who was warmly eulogized as the man who brought the modern conception of agriculture to the South and sowed seed that is now bearing an abundant harvest.

Census Bulletin 126 is Financial statistics of cities having a population of over 30,000. These are the figures of income and outgo for the fiscal year 1913. As there are now 199 cities of over 30,000 population, and as 55 of them are under the commission plan of government, the opportunities which these statistics afford for comparison and deduction are extensive.

Our mineral reserves, how to make America industrially independent, is a monograph by Dr. Geo. Otis Smith, Director of the United States Geological Survey, published as Bulletin 599 of that notable Government organization. Dr. Smith says at the very outset that "the United States is not only the world's greatest producer of mineral wealth, but, so far as estimates of the earth's treasures have shown, it possesses greater reserves of most of the essential minerals than any other nation." Then follow many sentences that invite quotation. "A geologic map is a graphic inventory both of the mineral resources

now used and of those that are untouched because they are at present of no value. He is indeed a bold prophet, however, who pretends to forecast either the probability or improbability of future usefulness of any raw material. As has been illustrated by the radium mineral carnotite, the mineralogic curiosity of one decade may become the valuable ore of the next. The principal ore of aluminum, bauxite, was not even mentioned in a list of useful minerals published by the Geological Survey 25 years ago." "The value of the mineral production of the United States now reaches \$2,500,000,000 a year." No other country can compete with us in abundance or variety of mineral resources. "The only essential minerals of the first rank of which the United States has no known supply at all commensurate with its needs are nitrates, potash salts, tin, nickel, and platinum. Probably no other nation in the world so nearly approaches absolute independence in respect to mineral resources." Bulletin 599 considers each important mineral product separately, showing production, consumption, uses, etc. Sold by the Superintendent of Documents at 5 cents.

American manufacturers and exporters who hope to acquire a South American trade will do well to get a copy of the Daily consular and trade reports for Aug. 28, 1914, and read with care the 4-page chapter entitled Important details in South American trade. Apparently North American methods must be somewhat modified to win success in South America.

Miscellaneous series 17, Foreign and Domestic Commerce Bureau, is a list of the publications on Latin America and the West Indies which that bureau has published. They are both numerous and useful. Sold by the Superintendent of Documents at 5 cents.

The sale of Post Office Department post-route and county maps has been transferred from the Disbursing Clerk of the Department to the Finance Division, Office of the Third Assistant Postmaster General.

The relation of the horsepower to the kilowatt is the title of Standards Bureau Circular 34, 2d edition. The relationship spoken of is a practical matter, and the determination by the Standards Bureau that a horsepower is the equivalent of 746 watts is also a practical matter. It agrees with the English standard and disagrees with the French and German standards. "Modern practice," says the circular, "is tending toward the more general use of the kilowatt and the disuse of the horsepower." This usage is recommended by the Bureau.

Banking and credit in Argentina, Brazil, Chile, and Peru is a recent publication of the Foreign and Domestic Commerce Bureau that has been and is in active demand. It is known as Special agents series 90 and sells for 10 cents.

Farmers' bulletin 609, Bird houses and how to build them, is authority for the statement that birds may be kept around our houses at all seasons of the year if their human friends will supply the needs of their small housekeeping. In winter they are often unable to find food. If this want is supplied they will stay with us always. If we provide for them comfortable winter houses they will occupy them. To help about this the bulletin gives drawings and descriptions of convenient and inexpensive bird houses.

In pursuance of its duty of establishing scientific standards for all sorts of utilitarian operations the Standards Bureau has issued its Circular 48, Standard methods of gas testing, 1st edition, a quarto of 180 pages, sold by the Documents Office at 35 cents.

The Monthly summary of commerce and finance of the United States has become the Monthly summary of foreign commerce of the United States. The new title appears first on (and in) the number for July, 1914, which is no. 1, series 1914-15. The statistics which it contains are for the month of July,

1914, and for the 7 months ending July, 1914, corrected to Sept. 4, 1914, and subject to revision.

With the exception of India, China is the greatest importer of cotton goods in the world, and Manchuria has long been one of the best markets for American cotton goods. In recent years, however, Japanese competition has seriously curtailed American sales in that field. The chief factors in the development of the cotton industry in Japan and that country's success in the Chinese market are summarized in a bulletin (Special agents series 86) issued in Aug. 1914, by the Bureau of Foreign and Domestic Commerce. It is a detailed study of the Japanese cotton industry by W. A. Graham Clark. From the Superintendent of Documents, 30 cents.

#### THE BIGGEST RECORD

The Congressional record, carrying the report of the proceedings of the 63d Congress, 2d session, which began Dec. 1, 1913, and is still sitting, has reached more than 250 daily numbers and 17,000 pages.

It will be known as volume 51, but will comprise nearly or quite 20 "parts," each part being a volume of about 1,000 pages. And these are not ordinary pages. They are double-column quartos and filled with a very compact type.

Each page contains fully three times as many words as are in a page of an ordinary book. A hasty calculation gives about 35,000,000 words in the 17,000 pages.

And the end is not yet.

#### MORE NEW MILITARY PUBLICATIONS

The Superintendent of Documents has just published a new edition of his Price list 19, Public documents appertaining to the Army and the organized militia of the United States. This list was intended to include the titles and prices of the military publications up to the moment of printing. And so it did. But as luck would have it, the very next day after the new list was put on the press several important new issues of the War Department, of which the Documents Office had no previous notice, were received. Mention is made of them here, and will be also in the Supplement to the new edition of Price list 19, that will evidently soon be called for.

Questions used in the competitive examination held in May, 1914, for the purpose of determining the mental qualifications of candidates for appointment as probational second lieutenants in the Corps of Engineers.

Regulations for the uniform of the United States Army. Revised edition. 1914. Paper, 10c.

Rules of land warfare. Fabrikoid, 50 cents.

Signal book, Army, 1914. (Supersedes Circular 7, 1912, revised Mar. 1913.) Cloth, 30 cents.

Tables of organization, organized militia, 1914, peace. Paper, 10 cents.

#### Topographic sheets

NOTE.—The Geological Survey is making a topographic map of the United States. The sheets of which it is composed are projected without reference to political divisions, and are designated by some prominent town or natural feature found on them. Three scales are ordinarily used, 1:62,500, 1:125,000, and 1:250,000. These correspond, approximately, to 1 mile, 2 miles, and 4 miles to 1 linear inch, covering, respectively, average areas of 230, 920, and 3,700 square miles. For some areas of particular importance special large-scale maps are published. The usual size, exclusive of the margin, is about 17.5 inches in height by 11.5 to 16 inches in width, the latter varying with the latitude. A description of the topographic map is printed on the reverse of each sheet.

Nearly two-fifths of the area of the country, excluding outlying possessions, has been mapped, every State being represented. Massachusetts, Connecticut, Rhode Island, New Jersey, and the District of Columbia are completely mapped. Sheets of the regular size are sold by the Survey at 10c. each; but in lots of 50 or more copies, whether of the same sheet or of different sheets, the price is 6c. each. In no case can orders be filled at the wholesale rate unless the sum remitted solely for topographic maps amounts to at least \$3.00.

## SMITHSONIAN INSTITUTION

NOTE.—In its latest price-list the Smithsonian Institution publishes this notice: "Applicants for these publications are requested to state the grounds for their requests, as the Institution is able to supply papers only as an aid to the researches or studies in which applicants are especially interested. The papers included in this list are distributed gratis, except as otherwise indicated. Publications should be ordered by the publication number, and arranged in sequence. The serial publications of the Smithsonian Institution are as follows: 1, Smithsonian contributions to knowledge; 2, Smithsonian miscellaneous collections; 3, Smithsonian reports. No sets of these are for sale or distribution, as most of the volumes are out of print. The Contributions to knowledge and Miscellaneous collections are distributed without charge only to public libraries, learned societies, institutions, and specialists in this country and abroad. The Smithsonian reports are regularly distributed by the Institution to libraries throughout the world, and only a limited number of the volumes remain to supply other demands. No general mailing-list of individuals is maintained. The reports can be purchased from the Superintendent of Documents, Government Printing Office, Washington, D. C. Remittances for publications not distributed gratuitously should be made payable to the 'Smithsonian Institution.' Applications from libraries should be accompanied by a statement of the number of volumes which they contain and the date of their establishment, and should have the endorsement of a Member of Congress." The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution.
